Part 1: To develop a website and host on Xampp
Step 1:Go to the official website of Xampp.
Select the suitable version and compatible installation.

Step 2:After installation open the Xampp control panel, we need to to start Apache server.

Step 3:setup Php project.Create a php project.Save the file
Save it in the htdocs that is on the Xampp folder.

```
<html>
<head>
<title>First PHP Program</title>
</head>
<body>
<?php
echo "This is advDeveops lab";
?>
```

Step 4:Start the Xampp server and go to local host in browser.
It should be localhost/filename.php

Output:
